

**Francisco J Melendez Laureano**

*Student*

Contact me at: [francisco.melendez4@upr.edu](mailto:francisco.melendez4@upr.edu)

**Concentration:**

Computer Science, Faculty of Natural Sciences

**About Me:**

I'm in my third year studying Computer Science, apart from studying about the subject at the university, I research and study briefly about smaller electronics which include microcontrollers, electronic sensors, and related systems.

Though these interests are on the hardware side, my current goal / personal research on the software side is proto-threading and it's implementation to single threaded micro controllers (i.e ATmega328P).

**Experiences / Skills:**

- Fixing computers, both as troubleshooting hardware and software.
- The management of software such as Microsoft Office and Google Drive.
- Assembling computer components, necessary peripherals and other electronic equipment.
- Building smaller microcontroller systems using sensors and the likes.
